Profile

Senior Software Developer/Tech Lead with a lot of startup experience. Proven track record of successfully delivering technical solutions. Excellent problem solving skills. Various open source contributions (Rails and plugins, ruby gems, elixir packages).

Experience

2008 - Present

Senior Software Engineer/Tech Lead (remote setup)

- **ReplayPoker.com** (London, UK), April 2019 - present
  Working as a Technical Lead for one of the largest poker sites. Headed the platform overhaul project to upgrade the gaming platform: a mix of Elixir and Ruby services connected via pubsub messaging. Responsible for database performance and capacity planning.
  Elixir, Ruby, Rails, React, Mysql, Postgres, k8s

- **Finam.ru** (Toronto, Moscow), Sep 2012 - Dec 2018
  Worked as part of the backend team responsible for trading operations support. Responsible for custom infrastructure for backtesting trading strategies for equities and futures markets.
  Ruby/Rails, Vue.js, Postgres

- **Gilt.com** (New York), Jul 2010 - May 2012
  Worked as part of the core Gilt team to roll out the initial implementation of the Home product line. Developed vendor portal for Gilt City. Lots of focus on performance as Gilt receives more than 10,000 http requests per second at peak times during daily sales.
  Ruby/Rails, Java, Postgres

- **ideeli.com** (New York), Feb 2008 - Jul 2010
  Responsible for back-end, performance and integration with third party services, as well as performance optimizations.
  Ruby/Rails, mysql, AWS/EC2

2006 - 2008

Lead Developer @ pingg.com (Toronto, New York)
Employee #1, hired and led the rest of the development team. Led design and development of the initial service prototype as well as the first public release. The startup was subsequently acquired by Celebrations.com
Ruby/Rails, mysql

1999 - 2006

Developer, Senior Developer, Architect @ Tucows.com (Toronto)
Responsible for architecture and development of Tucows' registrar services, including domain provisioning system (OpenSRS) and email/dns services: systems that generate over $50 million in revenue annually.
Java, Perl, Ruby, Oracle

Education

1998

Master in Computer Science.
Urals State Technical University, Russia
